

Secure Mailbox Solution™

Kaonsoft Secure Mailbox Solution™ offers a complete messaging solution at a fraction of market's best known email system costs. Coupled with Kaonsoft DocConverter & Viewer, it provides a completely contained environment, allowing for secure compliant communication means to connect you and your contacts. All messages and attachments are encrypted and exchanged while staged in a standalone fashion, decoupled from existing corporate email systems.

Boost Productivity

Help employees perform their jobs and access corporate data anytime, anywhere

Increase Effectiveness

Allow employees more access and be responsive using email on-the-go

Secure Documents

Stage and maintain own message repository, adding an extra layer of data protection

Improve Engagement

Offer real-time communication and data sharing with colleagues

Utilizing Mobile Technology for Fast Corporate Email Sync

Mailbox App

Main Features

Secure Mailbox

Keep messages and files staged apart from other corporate email systems with AES-256 encryption

Mailbox Features

Offer common features included in most email systems including inbox, write, reply, forward, archive and more

Secure Doc Conversion

Convert and encrypt attachments on-the-fly. Only the DocViewer can open the converted docs

Integration

Seamlessly integrate to a popular email server such as Microsoft Exchange, or any legacy system

DocConverter & Viewer

Main Features

Easy Conversion

Convert variety of document formats such as MS Office, spreadsheets, CAD, PDF and images into encrypted data

Batch Process

Support batch processing for multiple document conversions

Alerts & Notifications

Allow documents to be viewed only on secured mobile devices preventing screen captures
